Machine used daily to move rail cars on short flat track. Rebuilt in 2018 w/ approximately 2,000 hours since the rebuild. Hours on machine are due to machine left running during loading/unloading operations. Regular PM's & maint. as recommended by Trackmobile. Needs maintenance on planetary gear hub. The remote control works great and all PM's & repairs have been handled by Herculift out of Des Moines, IA. Equipment is selling as-is, where is. Buyer will be required to accept a sales agreement.
