As a renovation project it does suffer from rust and scratches to most panels and it is in need of a good clean internally and externally.

It has a kilometer speedometer which developed a fault after a few KM and was changed under warranty. Our client believes the vehicle has done under 40,000km
Our client ordered this vehicle direct from GM in United States in 1988. It was bought as a personal import, our client collected it from Belgium and drove it the UK. They also advised you can get a full sheet of MDF between the wheel arches ideal for sliding boxes in and out.
