The original factory delivery book record dates from 28th March 1939 and first registration as 19th July 1940. The car was originally listed as blue although this was updated to green by 1949. The vendor purchased the car in Manchester in 1966 for £130 and has since then undertaken a series of restoration works. The initial restoration took place from January to September 1967 and at this point the colour was changed to white with black wings. Further work took place from May 1985 to August 1986 when the colour was changed to ivory and black. There are a series of invoices from around 2013 detailing the work completed by Vermont Restorations of Yeadon, Leeds.
In 1998 the current owner tried to contact all past registered keepers of the car and copies of correspondence is included. He did manage to locate a number of the previous owners who very kindly provided their recollection of the car. It would appear that the original owner's husband was the sales director and senior partner in University Motors which was at the time located at Stratton House, Piccadilly. University Motors were the distributors of MGs for the whole of the South of England and registered MG number plates until they ran out. Another previous keeper confirmed that it was his 21st birthday present and he ran it whilst he was a reserve officer stationed in the Isle of Man, only having to sell the car when he returned home and started his studies. The correspondence gives this car a unique and interesting back story.
